BISSO MARINE PERFORMS SUBSEA BASKET LIFT

BELLE CHASSE, La. (Sept. 17, 2010) – BISSO MARINE, a premier provider of energy and maritime support services, successfully lifted two sections of a subsea basket weighing 275 tons each.

BISSO MARINE used the D/B CAPPY BISSO to lift the two sections of the subsea basket onto a materials barge for delivery offshore. The derrick barge had to hold one of the 275-ton sections in place while the two pieces were welded together.

Since 1890, BISSO MARINE has provided quality services to the marine and energy industries, offering marine construction, pipe laying, salvage, heavy lift and diving services. With offices and strategic alliances located across the Gulf Coast, South America, Europe and Asia, the BISSO MARINE fleet is uniquely positioned to provide a full range of maritime services and emergency response across the globe. For more information, please visit www.bissomarine.com.
